- Audience growth is trending upwards with exponential increases in revenues with new games and platforms launching.
- \$3.5 million in revenue and steadily growing.

# Mobile Gaming is on the Rise

The global mobile gambling market is expected to reach \$54 billion by the end of 2025.

Downloaded mobile games accounted for \$15.1 billion in 2019, which was the third most lucrative sector in the growing video game sector.

Statistics indicate that mobile gaming will continue to generate the most significant part of the video game market revenues in coming years.

2020 was a golden year for the mobile gaming industry that witnessed more people participated and played games on their phones than in previous years, largely due to the COVID19 pandemic. This has primed the market to grow exponentially, as both Barron's and The Wall Street Journal have recognized that these users have now built habits and are primed to earn more income to be spent within the mobile gaming market. Royal Wins is primed to experience this growth.

By examining the industry's trends and adopting them, Royal Wins developers can take advantage of this opportunity to increase their market share. Low-priced, undiscovered mobile gaming stocks like [Royal Wins \(CSE:SKLL\)](#) are best positioned to leverage the sharp upturn in prices, and give investors remarkable returns in a stable, growing market.

# Mobile Gaming Investors are Eager to Join This Growing, Highly Profitable Space

Over the past year, investors have already seen share prices of mobile gaming companies rise sharply:

Enthusiast Gaming Holdings Inc.  
(TSX: EGLX)

Investors have seen a *300% return*.

Zynga Inc. (NASDAQ: ZNGA)

Investors have seen a *414% return*.

Glu Mobile Gaming

Purchased for \$2.1 Billion by EA.

Clearly, the sector is growing rapidly. That being said, you're not too late.

We've been analyzing companies for awhile (our portfolio's have doubled in the past year, in fact), so we feel that we can give our opinion on the topic: how exactly do investors make money in growing markets?

Simple: you buy before the masses.

Every fortune in history happens when you buy an asset at a low price, and sell at a higher valuation.

Royal Wins is a perfect example of buying early. We know it's a revenue generating company in a growing space, which puts its market capitalization as a massive undervaluation (at the time of this report being written).

Based on current revenue models, the company is expecting \$10.4M in revenue for 2021/22.
